
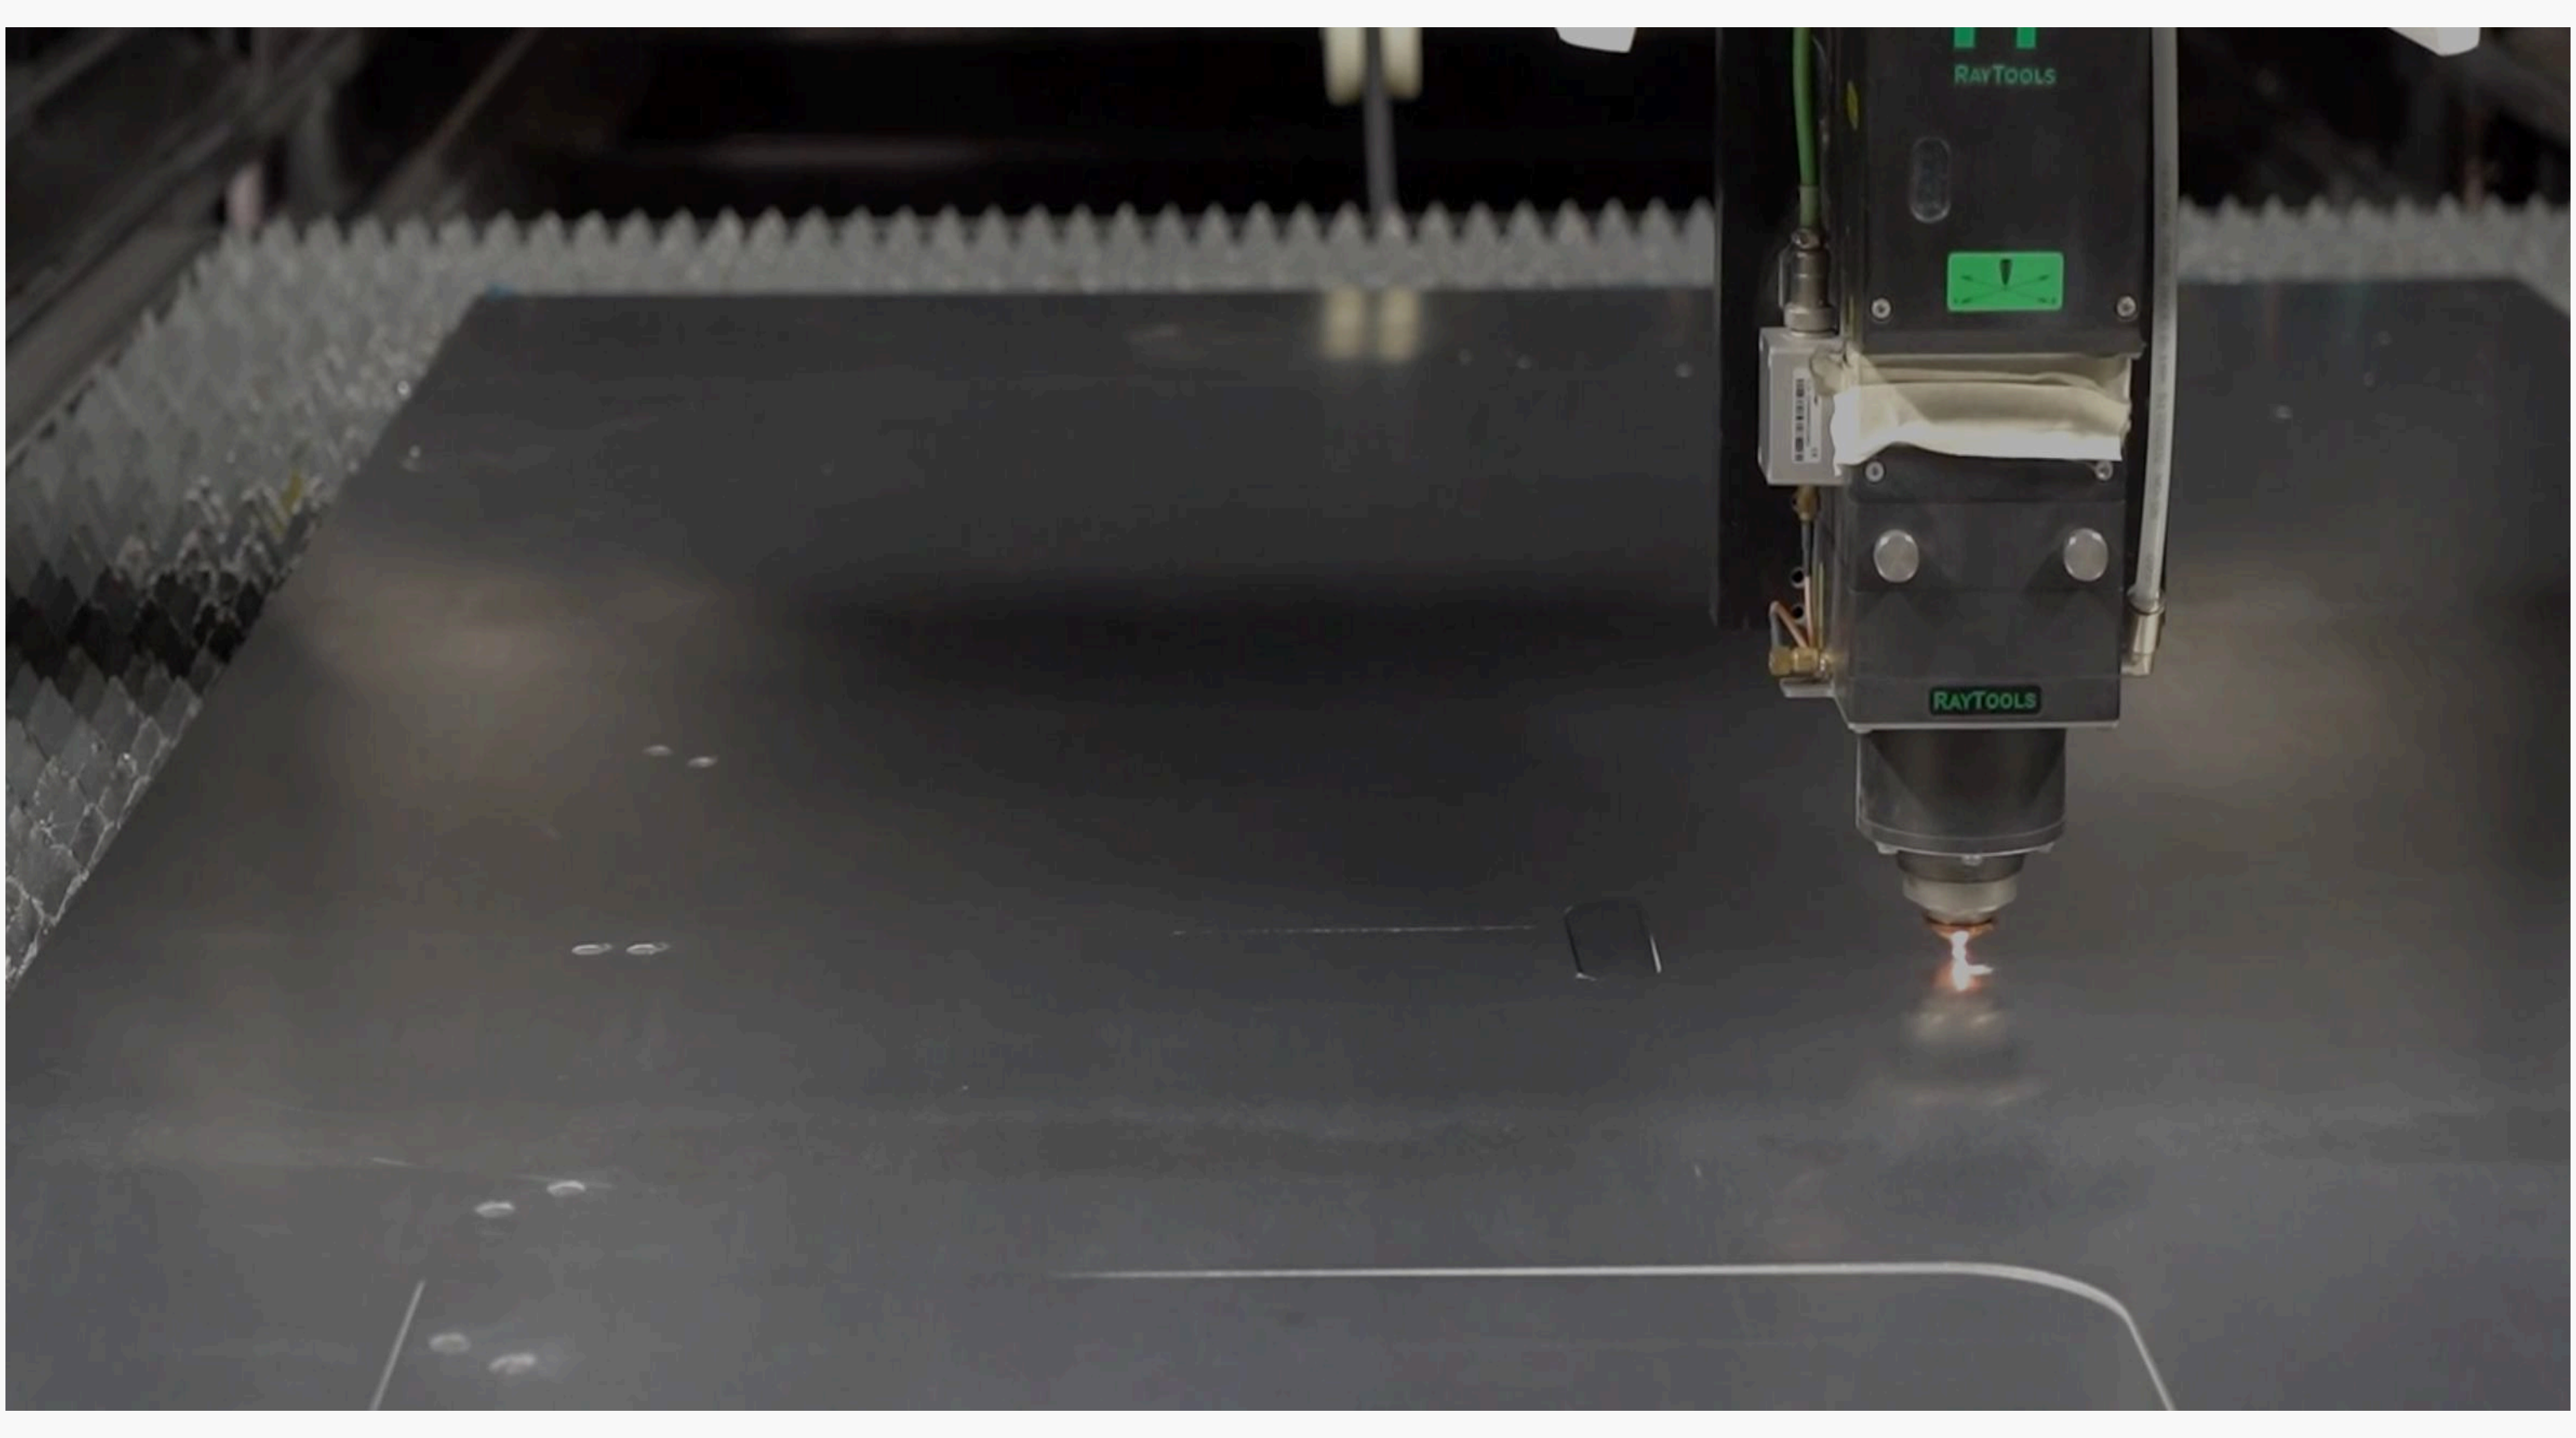
How It All Began

Beginning of story

A Family business driven by
a passion for furniture and design

From humble beginnings as a timber furniture producer in Australia, we have grown into a globally recognized manufacturer for outdoor furniture designer. Over the past 20 years, we have partnered closely with our international clientele to develop exclusive collections tailored to meet their specific market requirements.



Precise Craftmanship

Design That Reflect
Both Style and Function

At S2DIO, every piece we craft embodies precision, passion, and a commitment to redefining contemporary outdoor furniture design. With offices in Australia, Indonesia and Europe, our adaptable production process allows us to create bespoke collections in-house. Giving us the flexibility to produce exclusive designs without the burden of high minimum order quantities.

S2DIO adheres to the principle of form follows function where every expertly crafted product seamlessly combines ergonomic excellence with aesthetic appeal. Our commitment extends beyond mere design, as we take pride in utilizing materials that resonate with a universal sense of responsibility. Our passion lies in uncovering the inherent beauty within each manufacturing process, delivering products that evolve alongside the growth of your life, long after the initial purchase has been made.

Our Facilities and People

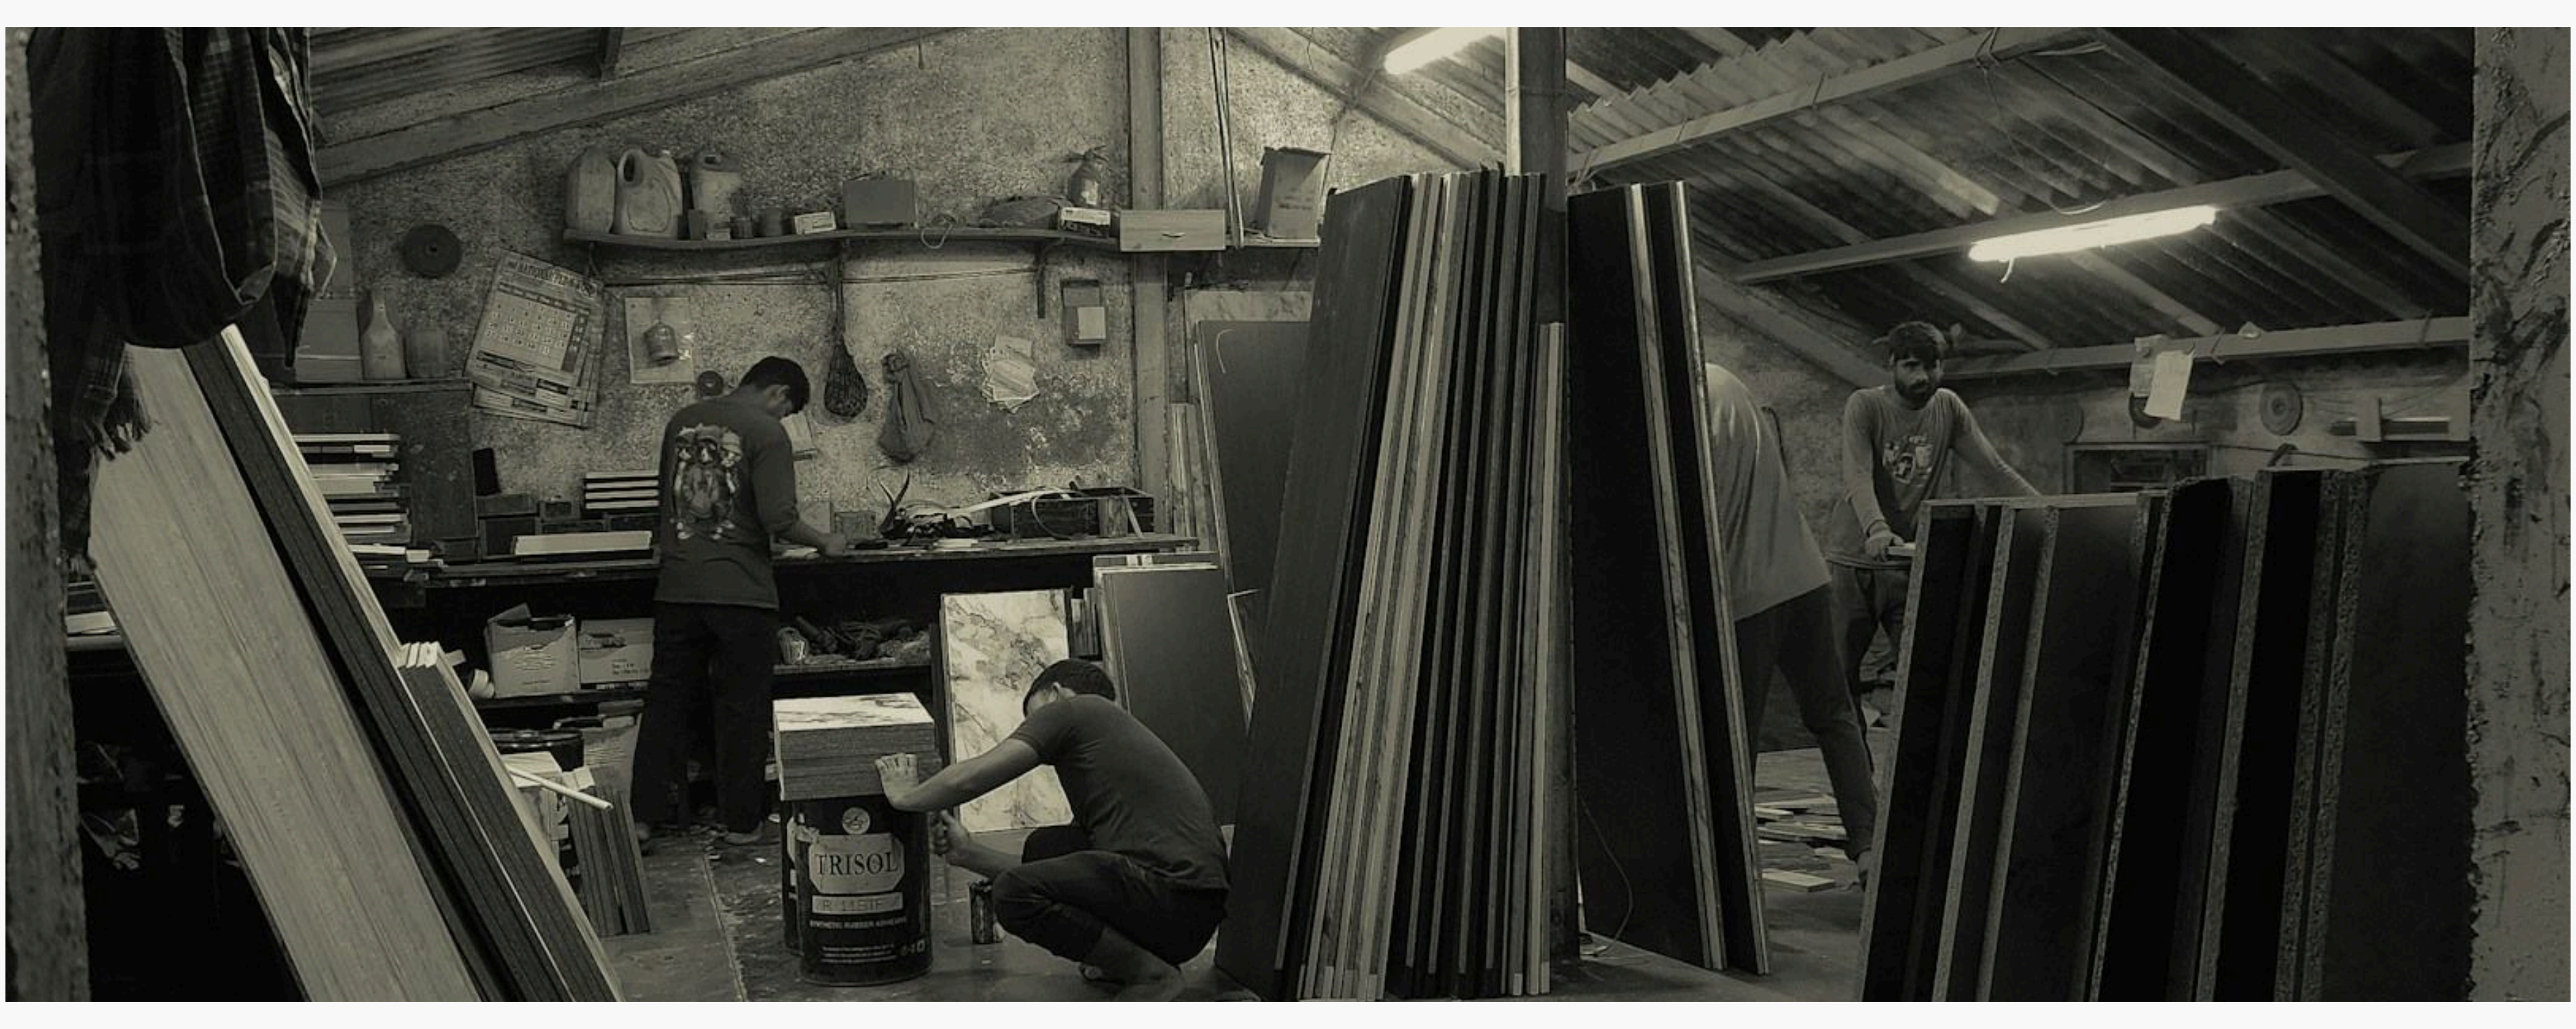
S2DIO has production facilities in Indonesia with up to and exceeding 1000 direct and indirect employees at any given time, making social accountability and corporate ethics both critical components of our core business.

Materials That Endure

At S2dio, we operate three key furniture production facilities, specializing in hardwood (teak), metal, and cushions. This strategic combination enhances our production capabilities and allows for seamless integration of diverse materials, aligning with contemporary design trends. Our robust production is supported by a dynamic product development team, with talented designers in Europe and Australia, manufacturing in Indonesia, and technical experts ensuring rigorous standards and quality supervision.

We take pride in our fully equipped product development workshops and showrooms strategically located in Australia, Indonesia, and Europe. These spaces are collaborative hubs for OEM and private label clients, facilitating the co-development of exclusive collections.

In early 2023, S2dio transformed from a manufacturer to a distinguished brand, emphasizing our commitment to innovation and exclusivity. Products bearing the S2dio logo reflect exclusive designs curated by our meticulous S2dio design lab, preserving the uniqueness of creations within our creative sanctuary. This solidifies S2dio as a beacon of ingenuity and craftsmanship in the furniture design landscape.



Social Accountability & Sustainability

S2DIO collaborates with leading associations to uphold ethical business practices and responsible forest management.

FSC

FSC® C117801

Forest Stewardship Council®

An international NGO dedicated to promoting responsible global forest management.

SVLK INDONESIA
LEGAL
VLHH-33-07-0059

Sistem Verifikasi Legalitas & Kelestarian

Committed to ethical manufacturing, S2dio adheres to SVLK, Indonesia's mandatory national certification system for timber legality and sustainability. Indonesia holds the FLEGT license, a result of the FLEGT VPA agreement with the European Union Commission since November 15, 2016. This license ensures compliance with EUTR, allowing safe entry into EU countries. Similar to FSC, SVLK guarantees that S2dio's products originate from legal, sustainable, and traceable sources.

SMETA®

SMETA

S2dio backs its commitment with certification. We are proud to be SMETA certified, ensuring our operations meet high standards in labor, health and safety, environmental performance, and ethics. This certification reflects our ongoing dedication to excellence.

Confident and proud, in delivering our products,
S2dio honors Mother Earth in every aspect
with the utmost respect.
